

Reveal 2020

Materials & Structural Analysis Virtual Events

Insights to advance your materials and structural analysis

Online everywhere | June 9–24, 2020

Join us for *Reveal*, a free series of virtual events where you will discover relevant, actionable insights and specialized solutions to help you overcome your most difficult challenges with materials and structural analysis. Extend your knowledge of **spectroscopy**, **electron microscopy**, **rheology**, and **software** that enable a comprehensive understanding of your samples.

Since we can't meet in person, *Reveal* is one way we are innovating to connect and support your breakthroughs. You'll walk away with valuable information to advance your materials and structural analysis and have the opportunity to network with technical experts and each other – all from the comfort of your home.

Reveal offers days of special webinars and panel discussions, each focused on a specific topic.

Science for Sustainability

Deepen your understanding of air, water, and soil contaminants, bio-friendly alternatives to environmentally harmful materials and research into alternative energy resources.

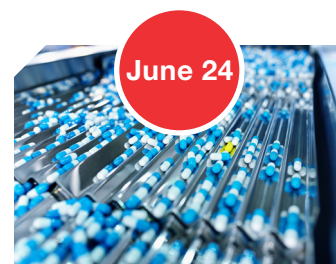

Next-Gen Materials

Expand your toolset for multi-scale, multi-modal analysis of tomorrow's materials.

Quality Control Solutions

Maximize your QA/QC lab productivity with tools that translate data into answers.

Pharmaceutical Formulation and Analysis

Gain efficiencies throughout your processes to discover, develop, and commercialize drugs, and ensure quality every step of the way.
